

CDPHP® Preventive Drug List

The Preventive Drug List & High Deductible Plans

While high deductibles may give members more control over their health care dollars, they can also make some members hesitant to maintain the preventive medications that are sometimes necessary for good health. So, CDPHP developed the CDPHP Preventive Drug List, a list of medications that are no longer subject to the deductible with all High Deductible plans. See the reverse side of this flyer for the complete list.

Although High Deductible plans typically provide benefits only after the deductible has been met, Federal regulations have put “safe harbor coverage” into place for qualifying preventive medications, allowing them to be exempt from the deductible. The preventive safe harbor does not include any drug or medication used to treat an existing illness, injury or condition.

How was the CDPHP Preventive Drug List developed?

The CDPHP Preventive Drug List is made up of medications that CDPHP, guided by our Clinical Pharmacy department, has determined may prevent the onset of a disease or condition when taken by a person who has developed risk factors for the disease or condition that has not yet manifested itself or has not become clinically apparent, or may prevent the recurrence of a disease or condition from which a person has recovered.

Other Guidelines for the CDPHP Preventive Drug List

Medications on the CDPHP Preventive Drug List are subject to formulary and tier status, as well as pharmacy management programs such as prior authorization, step therapy and/or quantity limits. For more detailed information about coverage and tier information, refer to the prescription drug formulary information online at www.cdphp.com.

This list is not a guarantee of coverage. To verify your benefits, limitations, and exclusions, please check your contract. While every effort has been made to ensure the list reflects the most accurate and up-to-date information, some information may be outdated. The CDPHP Preventive Drug List is subject to change based on decisions made by the CDPHP Clinical Pharmacy department.

For more information, contact the member services department at the phone number listed on the back of your identification card.

All of the highlighted prescriptions in the Preventive Drug list are part of the CDPHP Rx for Less program, an offering for all CDPHP members with a prescription rider. The program gives you a deep discount on specified generic drugs when purchased at CVS, Walmart, or Price Chopper, beating the prices of many other drug club programs by 90%! Visit www.cdphp.com for a full list of drugs in the Rx for Less program.
